LIMERICK LEADER. FRIDAY EVENING, JULY 27.

Previous the development of Irish recourse be use of our ich bliants, and possib'y f's export, it is quite within the bounds of grati-'ade to express, as we have done, our approciation of America's specialful efforts to supply we with the necessary product, from

her immense resources, in a time of extels. Naveribaless, we are not to be taken as forgesting the andaveloped feel reservoirs of our swn land. These have sleesdy received the very careful assention of the officials of Dall Kireann Trade Department by whom nothing has been left and one that would tend to their immediate development at the opportune

ply of peat, in the first place, the possibilities of scouring such are unbounded, and we gante the following from a report of the meeting of read. the Kilmsliock District Council, at which a etter was read from the Trade Department means of largely increasing employment was the inauguration of a National Tarf Cutting Scheme. The scheme went on to point out that at present I cland annually imported from England '1 million tone of soal, at a cost of final. ten million pounds, most of which represented wages. Out of 41 million tone imported, about I millions were need for domestic purposes, and could be replaced by peat. The scheme provided for each District Council to form a committee of its own members for the purpose of putting the project in working order."

Unfortunately the Kilmallook District Counoll area is not a turi outling one, and, there fore, the members were reluctantly compelled to abstatu f.om action.

Nevertheless, the inauguration of such cheme as mentioned is applicable to large lound to all directions, and some, already developed to a large extent, have not so far lofficials. cean fully availed of. The sime, however, is at hand when better conditions will exist for general and this question w.li be one of great mportanga.

Them, too, there is the question of Irish coal and that has not been by any means neglected by the responsible authority. Experiments have proved that the material is in the country and only awaits the opportudity and the means of ensuring its availability, in quantities which will tender us almost independent, when combined with the development of our turf resources, of the pecessity of importing feel in such quantities as have been, so far, reashing our shores.

Is is up to the members of the public bodies, to whose districts the Trade Department's outting, that they should immediately put it in train and the same will apply, later on, to a very much greater development of coal fields, more of which have already been located by experts of the Department.
