LIMERICK LEADER. FRIDAY EVENING, SEPTEMBER 16

For savaral years we have been urging th nizability and advantages of L'merlok as centre for the manufacture of cement.

We are paraloularly giad, therefore, chaseve that the Corporation has made a move in the matter that may one day avantuate in the establishment of the industry in our midet. As a meeting of the Whole House C. mmittee on Wednesday night a circular latter was read

from the Dablin Industrial Davelopment Association acking the Opporation to appoint a claim as that. The great concessions which delegates to the All Ireland Industrial Conferance to be held in Dablin on the 19th and ing scattement deserved, in my opinion, some 10th of October. The letter pointed out the necessity for

estab ishing now industries and extending and | by a single step, but have merely relterated in developing existing enterprises, and the Commiste dec'ded to recommend to the Conneil to appoint delegates and that the latter bring before the Conference the question of the manufacture of coment le this clay.

This is a decidedly practical step and we sinescely trant it will be followed up by sas tained energy and paraistent action until the destred result is fully achieved, as we believe can be.

Some filteen or sixteen years ago Mr Lyburn. Miner logist to the Department of Agriculture and Technical Instruction, visited Limeric' and made exhaustive lovestigations into the peach lities of satting up a coment factory is this contre. The conclusion he arrived at as the result of expert touts and analysis was that coment of the very finest quality could be made from the mud deposit that could be obtained in | asch. Hharty to peder at one time six moushs supply, inexhaustible y mantities from the Shannon

That conclusion holds as good to day as when it was arrived as by Mr Lyburn, and is a well that it by recalled just now in view of the praiseworthy action taken by the Corporation Committee on Wednesday night.

There are several reasons why a coment factory in Limerick should prove a tremendous

The demand for rement has been and is very great in Ireland, and it is certain to be greate still in the reconstructions and buildings and | was wandering on the sarests improvements that will follow the establish. ment-which we all hope for-of peace and settled conditions in this country.

The Irish cement industry at present to no. able to mest even a substantial fraction of the Irish demand, so that there can be no doubt that there is an ample home market for a hage further output.

Limeriak is ideally simused for the turning out of such an output. The material is on the spot in unlimited quaptities; the city is advantageously situated on the finest waterway in these tslands; and there is an abundance of labour and other facilities to make the success of such an enterprise absolutely assured from the erurs.

Enterprise, initiative and energy are the things most wanted, and we are optimistic enough to hope that these will be speedily forthcoming, too, seeing that the matter has been taken in hands in such a timely and practical manuer by our " City Fathers."

Feeling in Dublin

Mr Lloyd George's letter cancelling the con

"We can never go-back to the old state of affaire." In that way this feeling is expressed, but hew to find a way out pursies the most optimistic. It is taken for granted that Dail Eireann will make no furaber move until Mr Lloyd George sends his promised commun sisten after she meeting of the British Cabinet. So far as can be sarned no arrangements have been made for another meeting of the Uall. meeting will, it is assumed, be hold to consider the Premier's latter when it is received. This is not expected until the middle of next week. Several prominent members of the Dall ware at the Mansion House to-day, and Mr de Valera tale afteracon received a deputation from County Armagh, which protested against partition, and she inclusion of this county in she Northern Parliament, but there was nothing to be learned about the present orisis, and no de-
